

1.p151 .4 the question about subclass invoke a superclass constructor

<http://docs.oracle.com/javase/tutorial/java/landl/super.html>

Note: If a constructor does not explicitly invoke a superclass constructor, the Java compiler automatically inserts a call to the no-argument constructor of the superclass. If the super class does not have a no-argument constructor, you will get a compile-time error. `Object` does have such a constructor, so if `Object` is the only superclass, there is no problem.

2.p140
